

Dear Colleagues,

We are pleased to announce that the 9th **Asia-Pacific conference on Few-body problems in Physics (APFB2025)**, which will be held at Van Lang University in **Ho Chi Minh City, Vietnam** on **8 – 12 September 2025**.

Following the success of previous APFB2025, which recently was held in Tokyo (1999), Shanghai (2002), Thailand (2005), Indonesia (2008), Seoul (2011), Adelaide (2014), and Guilin (2017), and Kanazawa (2021), APFB2025 will facilitate stimulus exchange through a scientific program that covers most recent experimental and theoretical advances in the following topics:

- Few-body aspects of nuclear physics, nuclear astrophysics, atom and molecular systems, and cold atoms.
- Light nuclei, multi-neutron systems, alpha-cluster, neutron/proton-rich nuclei, related topics of nuclear structure and reactions.
- Few-nucleon systems, nuclear forces and currents including QCD inspired approaches.
- Hypernuclei, strange and exotic systems, few-hadron systems and their interactions.
- Hadron spectroscopy and structure, quark and gluon structure of hadron, Lattice QCD, proton-radius puzzle.
- Efimov physics, universality, dynamics of atomic and molecular systems.
- Interdisciplinary aspects of few-body physics and techniques.
- Symmetry and symmetry breaking, nuclear data science, nuclear transmutation studies, computational methods.
- Related topics for few-body systems.
